1. Check to see if python is installed with python –version

```
C:\Users\Edward\Desktop>cd ../..

C:\Users>python --version
Python 3.11.5

C:\Users>
```

      a. If this does not work then go to **manage app execution aliases** and turn off the following

| App Installer python.exe | Off |
| App Installer python3.exe | Off |

      b.

2. Make sure both python files are in the same directory

```
C:\>cd py-toool

C:\py-toool>dir
 Volume in drive C has no label.
 Volume Serial Number is 56C8-0420

 Directory of C:\py-toool

11/12/2025  04:22 PM    <DIR>          .
11/12/2025  04:22 PM    <DIR>          ..
11/12/2025  04:22 PM             8,327 win_forensic_collect.py
11/12/2025  04:22 PM             3,596 win_forensic_gui.py
               2 File(s)         11,923 bytes
               2 Dir(s)  80,568,225,792 bytes free
```

3. Run the tool with python win_forensic_gui.py then hitting **run collection** (it may automatically start)

4. Wait for the program to run then load the report from the same folder that the python files are in
